

# leo robotics

Do you disassemble and reassemble items at home? Do you enjoy learning how electrical, mechanical or microprocessor-based items work? Do you enjoy science, technology, mathematics and / or engineering?

Would you enjoy competitive robotics?

Students design, build, code and compete their VEX based robots in competition with other teams from Indiana and around the world.

We have continued to grow since robotics was introduced in Cedarville Elementary during the year 2016. From then until now, we have been to the Indiana State Championship five times and to the World Championship three times.

Coach Joe Kennedy is a chief engineer with a major defense contractor. He has 35+ years' experience in engineering and has taught software engineering at Central Texas College.

If this sounds interesting and you are in seventh grade or higher, consider applying for the Leo Robotics 2021 – 2022 team! Contact Coach Kennedy at [leorobotics@protonmail.com](mailto:leorobotics@protonmail.com) for more details.
